1. IDENTIFICATION OF THE SU Material Name Uses	:	TANCE/PREPARATION AND COMPANY/UNDERTAKING Shell Spirax S4 GS 75W-90 Transmission oil.
Product Code	:	001D8267
Manufacturer/Supplier	:	Shell India Markets Private Limited 2nd Floor, Campus 4A RMZ Millenia Park 143 Dr. MGR Road, Perungudi CHENNAI 600096 India
Telephone Fax		(+91) 04443450000 (+91) 04443451516
Emergency Telephone Number	:	+91 22 6516 1058

### 2. COMPOSITION/INFORMATION ON INGREDIENTS

**Mixture Description** : Highly refined mineral oils and additives.

#### Hazardous Components

Chemical Identity	CAS	EINECS	Symbol(s)	R-phrase(s)	Conc.
Amine phosphate	91745-46-9	294-716-2	Xn, Xi, N	R22; R41; R43; R51/53	1.00 - 2.40 %

Additional Information : The highly refined mineral oil contains <3% (w/w) DMSOextract, according to IP346. Refer to chapter 16 for full text of EC R-phrases.

#### 3. HAZARDS IDENTIFICATION **EC Classification** : Not classified as dangerous under EC criteria. **Health Hazards** Not expected to be a health hazard when used under normal 2 conditions. Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis. Used oil may contain harmful impurities. Signs and Symptoms Oil acne/folliculitis signs and symptoms may include formation : of black pustules and spots on the skin of exposed areas. Ingestion may result in nausea, vomiting and/or diarrhoea. Not classified as flammable but will burn. **Safety Hazards** : **Environmental Hazards** Not classified as dangerous for the environment.

I. FIRST AID MEASURES	
General Information	<ul> <li>Not expected to be a health hazard when used under normal conditions.</li> </ul>
Inhalation	: No treatment necessary under normal conditions of use. If
Skin Contact	<ul> <li>symptoms persist, obtain medical advice.</li> <li>Remove contaminated clothing. Flush exposed area with water and follow by washing with soap if available. If persistent</li> </ul>
	irritation occurs, obtain medical attention.
Eye Contact	: Flush eye with copious quantities of water. If persistent
Ingestion	irritation occurs, obtain medical attention. In general no treatment is necessary unless large quantities
-	are swallowed, however, get medical advice.
Advice to Physician	: Treat symptomatically.
. FIRE FIGHTING MEASURES	
Clear fire area of all non-eme	ergency personnel.
Specific Hazards	: Hazardous combustion products may include: A complex mixture of airborne solid and liquid particulates and gases (smoke). Carbon monoxide. Unidentified organic and inorganic compounds.
Suitable Extinguishing	: Foam, water spray or fog. Dry chemical powder, carbon
Media	dioxide, sand or earth may be used for small fires only.
Unsuitable Extinguishing Media	: Do not use water in a jet.
Protective Equipment for Firefighters	<ul> <li>Proper protective equipment including breathing apparatus must be worn when approaching a fire in a confined space.</li> </ul>
-

# Effective Date 14.05.2012

# **Material Safety Data Sheet**

	appropriate controls for safe handling, storage and disposal of this material.
Handling	: Avoid prolonged or repeated contact with skin. Avoid inhaling
	vapour and/or mists. When handling product in drums, safety
	footwear should be worn and proper handling equipment
	should be used.
Storage	: Keep container tightly closed and in a cool, well-ventilated
	place. Use properly labelled and closeable containers. Store at
	ambient temperature.
<b>Recommended Materials</b>	: For containers or container linings, use mild steel or high
	density polyethylene.
Unsuitable Materials	: PVC.
Additional Information	: Polyethylene containers should not be exposed to high
	temperatures because of possible risk of distortion.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

If the American Conference of Governmental Industrial Hygienists (ACGIH) value is provided on this document, it is provided for information only.

#### **Occupational Exposure Limits**

Material	Source	Туре	ppm	mg/m3	Notation
Oil mist, mineral	IN OEL	TWA(Mist.)		5 mg/m3	
	IN OEL	STEL(Mist.)		10 mg/m3	
	ACGIH	TWA(Inhala ble fraction.)		5 mg/m3	

Exposure Controls Personal Protective Equipment	:	The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include: Adequate ventilation to control airborne concentrations. Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated. Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.
Respiratory Protection	:	No respiratory protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid breathing of material. If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers. Where air-filtering respirators are suitable, select an appropriate combination of mask and filter. Select a filter suitable for combined particulate/organic gases and vapours [boiling point >65°C(149 °F)].

Hand Protection	Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection: PVC, neoprene or nitrile rubber gloves. Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, glove thickness, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended.
Eye Protection	: Wear safety glasses or full face shield if splashes are likely to occur.
Protective Clothing	: Skin protection not ordinarily required beyond standard issue work clothes.
Monitoring Methods	: Monitoring of the concentration of substances in the breathing zone of workers or in the general workplace may be required to confirm compliance with an OEL and adequacy of exposure controls. For some substances biological monitoring may also be appropriate.
Environmental Exposure Controls	: Minimise release to the environment. An environmental assessment must be made to ensure compliance with local environmental legislation.
9. PHYSICAL AND CHEMICAL P	ROPERTIES
Appearance	: Light brown. Liquid at room temperature.
Odour	: Slight hydrocarbon.
рН	: Not applicable.
Initial Boiling Point and Boiling Range	: > 280 °C / 536 °F estimated value(s)
Pour point	: Typical -45 °C / -49 °F
Flash point	: Typical 208 °C / 406 °F (COC)
Upper / lower Flammability or Explosion limits	: Typical 1 - 10 %(V) (based on mineral oil)
Auto-ignition temperature	: > 320 °C / 608 °F
Vapour pressure	: < 0.5 Pa at 20 °C / 68 °F (estimated value(s))
Density	: Typical 885 kg/m3 at 15 °C / 59 °F
Water solubility	: Negligible.
Solubility in other solvents	: Data not available
n-octanol/water partition coefficient (log Pow)	: > 6 (based on information on similar products)
Dynamic viscosity	: Data not available
Kinematic viscosity	: Typical 75.6 mm2/s at 40 °C / 104 °F
Vapour density (air=1)	: > 1 (estimated value(s))
Evaporation rate (nBuAc=1)	: Data not available
10. STABILITY AND REACTIVITY	
Stability	: Stable.
Conditions to Avoid	: Extremes of temperature and direct sunlight.
	<ul><li>Extremes of temperature and direct sunlight.</li><li>Strong oxidising agents.</li></ul>
Conditions to Avoid	

Basis for Assessment	Information airron is board on date on the common arts and the
	: Information given is based on data on the components and the toxicology of similar products.
Acute Oral Toxicity	: Expected to be of low toxicity: LD50 > 5000 mg/kg , Rat
Acute Dermal Toxicity	: Expected to be of low toxicity: LD50 > 5000 mg/kg , Rat
Acute Inhalation Toxicity	: Not considered to be an inhalation hazard under normal
Acute initialation reality	conditions of use.
Skin Irritation	: Expected to be slightly irritating. Prolonged or repeated skin
	contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.
Eye Irritation	: Expected to be slightly irritating.
Respiratory Irritation	: Inhalation of vapours or mists may cause irritation.
Sensitisation	: Experimental data has shown that the concentration of potentially sensitising components present in this product does not induce skin sensitisation. May cause an allergic skin reaction in sensitive individuals. (Amine phosphate)
Repeated Dose Toxicity	: Not expected to be a hazard.
Mutagenicity	: Not considered a mutagenic hazard.
Carcinogenicity	: Product contains mineral oils of types shown to be non- carcinogenic in animal skin-painting studies. Highly refined mineral oils are not classified as carcinogenic by the International Agency for Research on Cancer (IARC). Other components are not known to be associated with carcinogenic effects.
Reproductive and Developmental Toxicity	: Not expected to be a hazard.
Additional Information	: Used oils may contain harmful impurities that have
	accumulated during use. The concentration of such impurities
	will depend on use and they may present risks to health and the environment on disposal. ALL used oil should be handled with caution and skin contact avoided as far as possible.
Ecotoxicological data have no	the environment on disposal. ALL used oil should be handled with caution and skin contact avoided as far as possible.
Ecotoxicological data have no based on a knowledge of the Acute Toxicity	<ul> <li>the environment on disposal. 	expected to be released to air in any significant quantities. Not expected to have ozone depletion potential, photochemical ozone creation potential or global warming potential.
13. DISPOSAL CONSIDERATIONS	
Material Disposal :	Recover or recycle if possible. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations. Do not dispose into the environment, in drains or in water courses.
Container Disposal	Dispose in accordance with prevailing regulations, preferably to a recognised collector or contractor. The competence of the collector or contractor should be established beforehand.
Local Legislation	Disposal should be in accordance with applicable regional, national, and local laws and regulations.

### 14. TRANSPORT INFORMATION

#### Land (as per ADR classification): Not regulated

This material is not classified as dangerous under ADR regulations.

#### IMDG

This material is not classified as dangerous under IMDG regulations.

#### IATA (Country variations may apply)

This material is either not classified as dangerous under IATA regulations or needs to follow country specific requirements.

### **15. REGULATORY INFORMATION**

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

EC Classification EC Symbols EC Risk Phrases EC Safety Phrases Chemical Inventory Status	: :	Not classified as dangerous under EC criteria. No Hazard Symbol required Not classified. Not classified.
