

Gulf Gear ZC

Automotive Gear Oil

Product Description

Gulf Gear ZC is a gear lubricant designed to provide effective lubrication in a wide range of automotive transmissions where API GL-3 type gear oils are acceptable. It is formulated from refined base stocks and balanced extreme pressure additives to provide adequate protection to gear components against wear, oxidation degradation and rust & corrosion.

Features & Benefits

- Provides protection against wear and rust & corrosion
- Minimises deposit formation
- Good low temperature fluidity reduces wear at start-up under low ambient temperatures
- Good anti-foam properties ensure film strength for effective lubrication

Applications

- Manual transmissions and axle drives where API GL-3 quality oils are specified
- On-road passenger cars, light and heavy duty trucks, buses and vans operating under mild to severe conditions of speed and load
- Spiral Bevel axles operating under mild to moderate conditions of speed and load
- Not intended for axles with hypoid gears
- Not recommended for automatic transmissions

Specifications, Approvals & Typical Properties

Meets the following Specifications		80W-90	85W-140
API GL-3		X	X
Typical Properties			
Test Parameters	ASTM Method	Typical Values	
Viscosity at 100 °C, cSt	D 445	16.00	29.00
Viscosity Index	D 2270	101	97
Flash Point, °C	D 92	215	220
Pour Point, °C	D 97	-27	-18
Density @ 15°C, Kg/l	D 1298	0.889	0.895

Properties mentioned above are typical only and minor variations, which do not affect the product performances, are to be expected in normal manufacturing. The above information is based on past history of the grade only and must not be construed as a guarantee of performance. Follow equipment manufacturer's recommendations for performance level and viscosity grade. The Material Safety Data Sheet for this product is available from your nearest Gulf Distributor.
